EDUCATION

University
2019 - 2023
Computer Science - Faculty of
Automatics, Craiova

SKILLS

- Experience in ASP.NET 6 and 7, MVC, MVVM patterns, CRUD operations, database queries(multiple projects present in the GitHub link)
- Experience in stand-alone C#, having certified courses on Udemy
- Developed a C++ game, using SFML engine(can be found on GitHub)
- Knowledge in Angular when it comes to front-end design
- Knowledge in QT(used for a school project)
- Experienced in HTML/CSS/JS

PROFILE

Experienced software developer with more than 3 years of expertise, eager to transition into a web developer role. Proficient in web technologies, I bring a passion for creating user-centric web applications and a commitment to delivering high-quality results. Ready to contribute to a dynamic team and tackle new challenges in web development.

WORK EXPERIENCE

STANDARD SCRIPTWRITER
Ipsos Interactive Services
March 2022 - present

- Transform surveys from a document form(Word, Excel) into a web survey, using a mix of HTML+CSS+JS when it comes to design and behavior, while using an internal language similar to python when it comes to creating custom routings or validations, which would apply to client's needs
- Have KOM calls, and discussions with international clients, regarding the project planning, or eventual issues that are faced during the scripting phase
- Debug, test, and optimize different modules, and process the received responses for a more client-oriented solution
- Work in a team including a Project Manager and a Quality Assurance

I consider that, being my first job, it really helped me get used to working in a team, respecting a time schedule, have a more formal approach when it comes to communication via e-mails, and develop my overall sense of detail and attention.
